CLINICAL
COGNITIVE ASSESSMENT

A clinical cognitive assessment with RHBNeuro can give you important insight on the health of your **memory, reasoning, processing**, and so much more!

The way your scores may change over time is **crucial** to guiding your care plan, especially if there is a drastic change after a **recent adverse event, added/removed/edited medication**, or **new behavior(s)**.

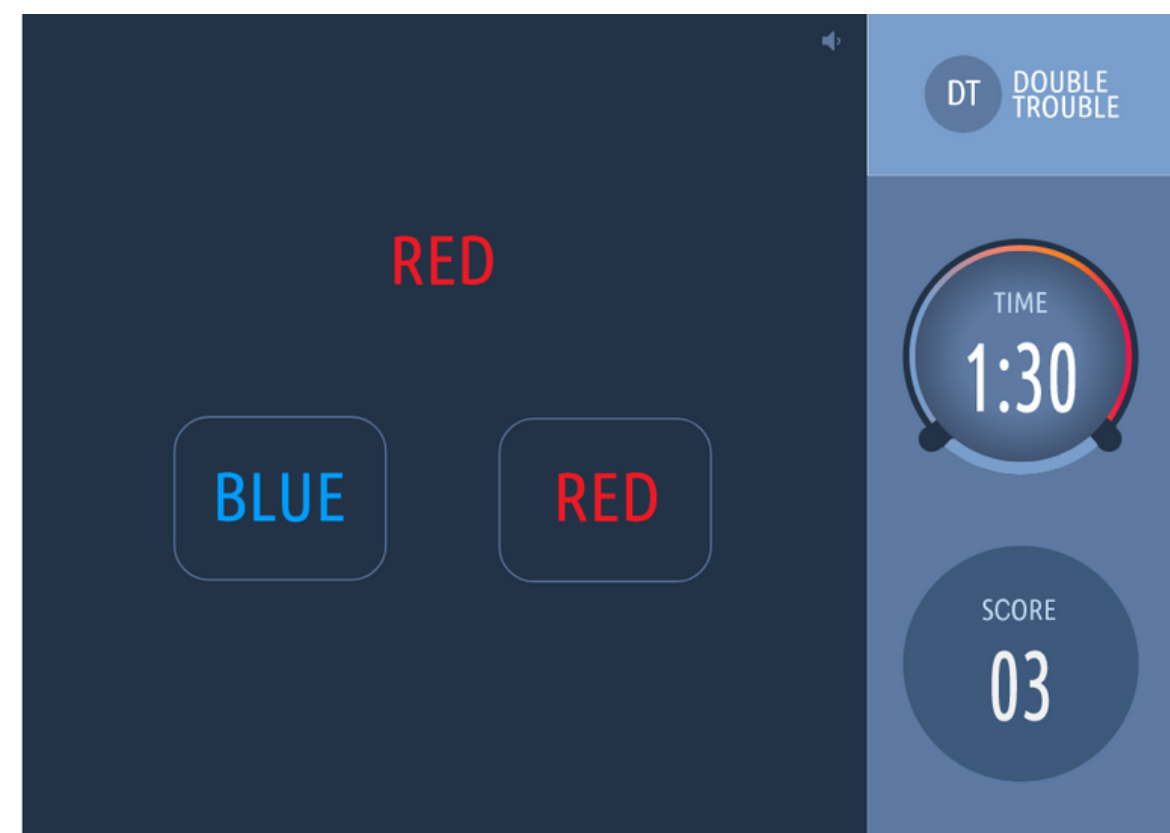

NEUROCOGNITIVE TASK EXAMPLES

DIGIT SPAN

A classic verbal short-term memory task.

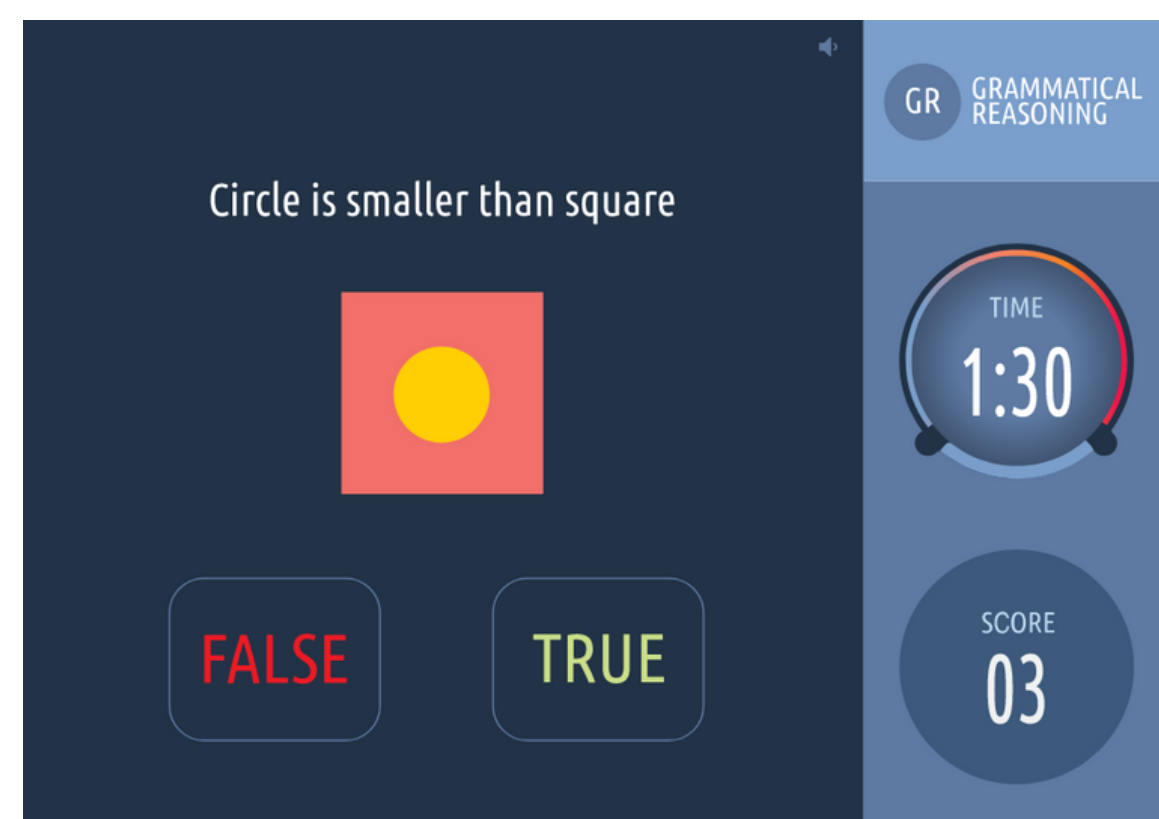

DOUBLE TROUBLE

A Stroop task to assess response inhibition.

FEATURE MATCH

An attention task.

GRAMMATICAL REASONING

A verbal reasoning task.
