

STROKE Prevention

RHB
Neuro

RHBNeuro has recommended you to enroll in our **Stroke Prevention Focused Remote Patient Monitoring (RPM) program**, which was created by Medicare to enable better following of chronic conditions.

Our Care Coordinators are here to help you **identify trends** and **provide support** towards your goals for a **healthier life**.

SERVICES

- Consistent monitoring of physiologic data including
 - blood pressure
 - weight
 - heart rate
- This information will be used to better support comprehensive care for your chronic condition.
- Periodic check-ins with a care coordinator to track your health trends and goal progress.
- Real-time text notification of abnormal measurements, plus timely intervention to concerns with abnormal measurements

Call us at (972) 423-0977 extension 414 to learn more!
